

CV Feedback

Laura Sherliker

- "Means I would be a valuable addition to any team" - too general... what job are you actually applying for?
- CONTACT ME - Not keen on the visual of this!
- Like the breakdown of schemes into different categories
- Less words more images would be better for examples of work
- Not sure about the use of so many colours especially the yellow
- Is the contact info on every page necessary?
- Do you need so much information on each project?
- Like the layout of the project sheets
- Main CV is short and sweet which is good

Michael Chadwick

- Front page - should state name as well as / instead of "CV"
- Too many first pages... CV... Job Title... Name.... Contents... etc
- Would it lose its impact once printed?
- Simple random layout which I like
- ALOT of info... many needs narrowing down?
- Some images really small
- Text is all the same size... many define certain bits... create hierarchy in the text
- No clear idea of timescale or chronology
- Unsure as to what direction you want your career to move in?
